

I feel a national law regarding phone privacy (No Call) is a positive thing, I feel that the rights of all states must be conserved. The Indiana law prohibiting companies from calling anyone on the no call list is working.

As in polution laws, I feel that each state should be able to make the call as to how best to regulate the population of each state. A precedent has been established with respect to Auto emissions. There is federal law and each individual state also regulates the safe emmissions for their individual state. How does the (No Call Law) differ from the Auto industry?

LEAVE THE INDIVIDUAL STATES FREE TO ESTABLISH LAWS TOUGHER THAN THE FEDERAL LAW AND ALLOW STATES TO GOVERN THEMSELVES.
